State-certified Technical Assistant for Information and Communication Technology

B.Sc. Business Information Systems and Digital Media · HdM Stuttgart · Expected Graduation 02/2029

Availability: Available immediately as working student (20 hrs/week) · Full-time available until Sept 30, 2026

Work Authorization: Permanent Residence Permit (Germany)

PROFILE

State-certified Technical Assistant for Information and Communication Technology, aktuell im B.Sc. Wirtschaftsinformatik an der Hochschule der Medien.

Operates self-hosted server and network infrastructure for years: homelab server running Unraid with virtual machines, Docker containers, Nginx reverse proxy, VPN, and network-wide DNS.

Developed custom Android kernel with automated nightly Jenkins builds, publicly verifiable as an XDA Recognized Developer – proven track record, not just claims.

2.5 years experience as a customer-facing working student at DB Regio AG alongside full-time studies: calm, solution-oriented communication even in high-conflict situations.

TECHNICAL SKILLS

Servers & Operating Systems: Windows Server, Active Directory, Gruppenrichtlinien, DNS, DHCP · Linux: Debian, Ubuntu, Arch · Nginx, Serveradministration

Networking: Routing, Firewall, DNS/DHCP, Reverseproxy, Dynamic DNS · VPN: WireGuard, OpenVPN · TLS Certificates with Let's Encrypt · Enterprise Network Planning & Configuration

Virtualization & Containers: VMware vSphere/ESXi, VMware Workstation · KVM/QEMU, Unraid · Docker

Automation & CI/CD: Jenkins, Bash, Shell-Scripting, Batch-Scripting · Git: GitHub, GitLab, Branching, Code Reviews

Storage & Backup: NAS, RAID 0–10, ZFS, Snapshot & Backup Concepts

Programming: C/C++, Java, JavaScript, Python

Embedded & Hardware: Android/AOSP, Kernel, SELinux · Raspberry Pi, Arduino, ESP · Soldering & Microsoldering

AI & Agents: GPT, Gemini, Claude, OpenRouter · local models: Ollama, DeepSeek · Multi-Agenten-Workflows

Design & Media: Photoshop, InDesign, Premiere Pro, After Effects

PROJECTS

Android / AOSP

Custom ROM & Kernel Development for Android

XDA Recognized Developer since May 9, 2018 · xdaforums.com/m/mountaser-halak

- Moun Kernel: Custom Android kernel featuring four CPU governor profiles to optimize battery life and performance
- Ported and maintained CyanogenMod and Resurrection Remix ROMs, maintaining up to 10 devices simultaneously
- Device Trees: Cherry-picking fixes, debugging build errors, extracting and shimming vendor binaries
- Automated nightly builds powered by Jenkins · github.com/mountaser/Moun_Kernel_Tissot

Homelab

Custom-Built Homelab Server – NAS, Virtualization, Smart Home

Self-planned, built, and operated infrastructure using repurposed hardware

- Unraid with virtual machines, Docker containers, and ZFS NAS storage
- Previously managed leased bare-metal server virtualized with VMware vSphere/ESXi
- Nginx reverse proxy, Pi-hole network-wide DNS, Dynamic DNS, external VPN access
- Home Assistant for voice automation, connected to Google Cloud API over HTTPS custom domain

Java / Android	Rebranding & Customization of Commercial Radio App Commercial client project for an enterprise customer • Rebranded commercial app: logos, color palette, copy, themes, and navigation • Custom extensions: video splash screen, streaming API, Firebase, OneSignal push notifications, web/social links
Embedded / IoT	Electronics & IoT Projects Arduino, ESP, Raspberry Pi · Soldering & Microsoldering • RFID Security System: Vocational college capstone project (Grade: Very Good / 1.0) • ESP projects including addressable LED control integrated with Home Assistant
Medien	Personal Tech Channel: Videos on Android System Software & PC Hardware Solo production: scriptwriting, camera, video editing, audio, motion design, and graphics • Technical explainer videos on Custom ROMs, Project Treble, OS installation, and hardware comparisons • Complex technical topics explained clearly for a non-technical audience • Regular live streams with direct audience interaction • Camera operation & co-direction for a music video production
WORK EXPERIENCE	
11.2023 – 06.2026	Ticket Inspector & Passenger Service · DB Regio AG • Working student position via Job Valley staffing agency, approximately 2.5 years alongside full-time studies • Ticket inspection and passenger assistance throughout the VVS network • Confident, customer-oriented approach even in conflict situations
